

EBN111/122

Submission of
Assignments on AMS
<https://ams.up.ac.za/>

Assessment Management System (AMS)

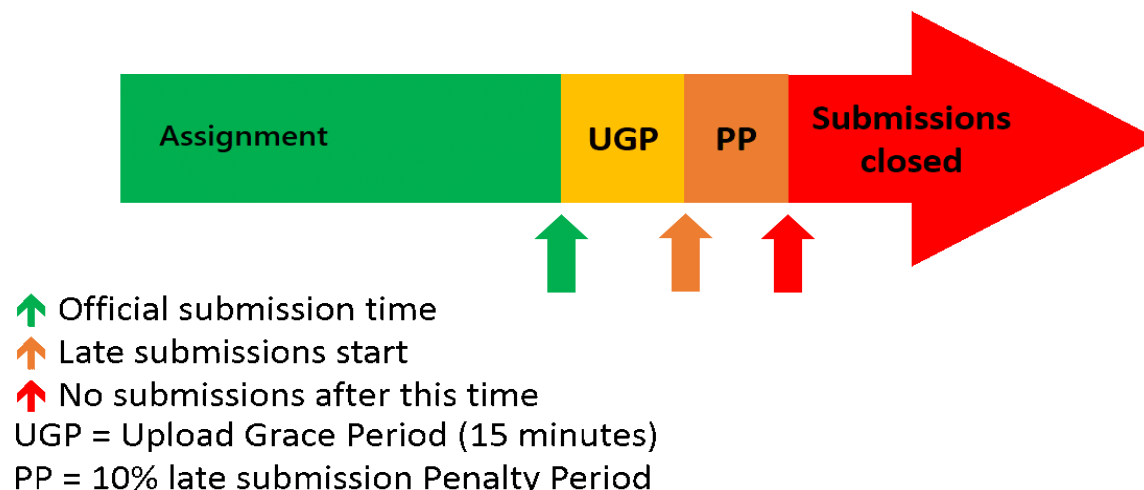

- All EBN **Assignments** are done via AMS.
 - Questions involve the analysis of circuits.
 - Only the final answer is marked.
 - The marking is done automatically.
 - The assignments are answered on a Excel spreadsheet.
 - The Excel spreadsheet is submitted on AMS.
- Rules for entering answers can be found in [here](#). (Refer to section 4.)

Timeline for an Assignment

1. An announcement on ClickUP will indicate when a new assignment is available.

An assignment is usually released the Friday before the Monday it's due date. (See the Lecture schedule.)

2. **Start the assignment as soon as possible.**
3. Upload your answers before the **Official submission time**.
4. There is a 15min **Upload Grace Period** after the **Official submission time**.
5. The 10 minute long **Penalty Period** starts after the **Upload Grace Period**. There is a 10% penalty on your final mark if you upload during the **Penalty Period**.
6. The **Submissions Close** after the **Penalty Period**.

Timeline for an Assignment

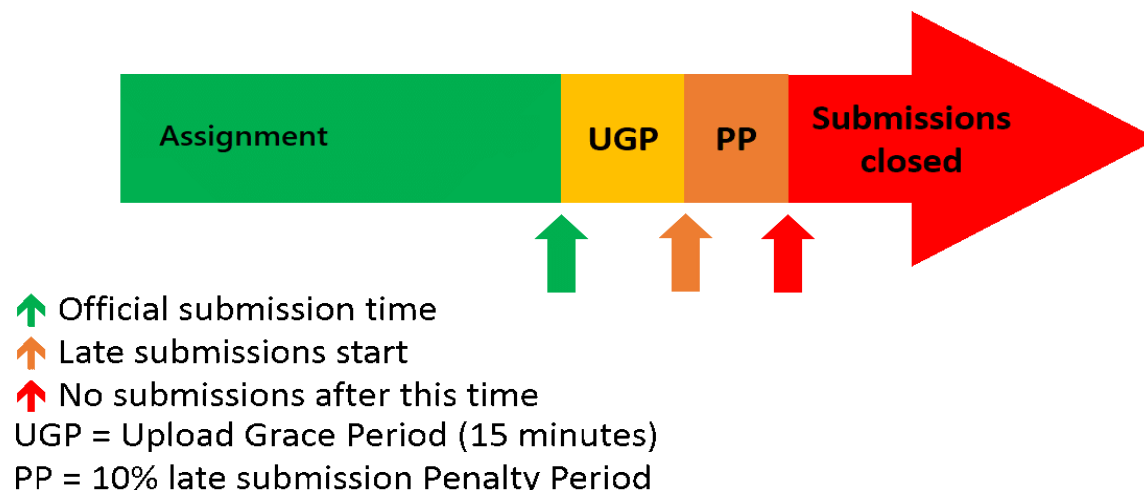

Note,

- The assignments are available for more than 7 days.
- If you miss an assignment, you receive a mark of zero.
- There are no aegrotat (sick) assignments.

If you have difficulties to submit an assignment, you can contact

ebn2022.ams@gmail.com

only during the **green period** of the timeline!

Step 1: Access AMS

- Go to <https://ams.up.ac.za/> using your browser.
- Click on Forgot Password link to create a new password.

← → ↻ ams.up.ac.za/users/login/ ☆ ABP

Judicator AMS

JUDICATOR ASSESSMENT MANAGEMENT SYSTEM

Please log in by entering your 8-digit "u" username.

Username, for example: u01234567

Password

NOTE: This is your Judicator AMS/EPS password, not your UP Portal password.

LOGIN

[Forgot or change password](#)

Create new password by clicking on "Forgot Password"

NOTICE (new users):

- Once your module lecturer has activated 2020 assessments you will be able to use the "Forgot or change password" link to set a new password. Until then you will be unable to access the AMS system.
- The Judicator AMS system is not integrated with the UP Portal / ClickUP systems. Your UP Portal / ClickUP password cannot be used to access the AMS.

Step 1: Access AMS

- Enter your tuks email eg. u16586489@tuks.co.za
- You will receive a link in your email to reset your password.
- Click on that link. If that leads to a message saying that the link is expired, then copy the link to another **window** and try again. If that doesn't work then restart the browser and paste the link again.
- Login using your new password.
- Enter the module page 2022EBNxxx.

JUDICATOR PASSWORD RESET

In order to reset your password, enter your registered email address. For students this will be your @tuks.co.za address. For staff this will be your @up.ac.za address.

Email

SUBMIT

Step 2: Download the Assignment PDF and Excel File

- On the home page all the previous and current assignments will be visible.
- Click on the assignment you want to do.

Judicator AMS JD le Roux (u04407342) Logout

Step 2: Download the Assignment PDF and Excel File

- Scroll to the bottom of the page, the files made available by the lecturer will be found here.

Judicator AMS M Trivedi (u16039531) Logout

Q3	Current from energy	2.00	2.00
3	Find I	2.00	2.00
Q4	Time domain Power	2.00	2.00
4	Find A	1.00	1.00
5	Find B	1.00	1.00
Q6	Power of sources	2.00	2.00
6	Find P	2.00	2.00

Excel and PDF file found here.

Assessment Files: Visible to Students

Name	Date modified	Size
2021EBN111A01.pdf	2021-03-16 14:59:33 SAST	157,977

© 2021 University of Pretoria – Department of Electrical, Electronic and Computer Engineering V2021.069 16:10

Step 3: Do the assignment questions

- Open the PDF.
- Notice how some values in the question are given as variables (a , b and c).
- These parameters are randomized for each student and can be found in the downloaded excel spreadsheet.

Question 1 [2]	
Given: a, b .	
What will the cost R be of playing on an X-box for a minutes every day for one week, if the power rating for the X-box is b W and the electricity cost is R1.75 per kWh?	
01	Determine R [2]

Step 3: Do the assignment questions

- Note the parameters in the excel spreadsheet and complete the question.

Question 1				
	Parameter / Description	Numerical	Units / Alphanumeric	Marks
01	a	90	min	
	b	50	W	
	R			2
			Total	2

dl. $a = 90 \text{ min}$
 $b = 50 \text{ W}$

$90 \text{ min} \times 7 \text{ days} = 630 \text{ min}$

$\frac{630 \text{ min}}{60} \times \frac{50 \text{ W}}{1000} = 0.525 \text{ Kw.h}$
 convert to hours converting to Kw

$\Rightarrow \text{cost} = 0.525 \text{ Kw.h} \times 1.75 \frac{\text{R}}{\text{Kw.h}} = \text{R}0.91875$

Step 3: Do the assignment questions

- Repeat process for question 2.

Question 2				
	Parameter / Description	Numerical	Units / Alphanumeric	Marks
	c	12	V	
02	I			2
Total				2

Q2. $C = 12V$

$$I = \frac{\Delta q}{\Delta t}$$

$$\Delta t = 24 \text{ hours}$$

$$\Delta q = ?$$

$$V = \frac{\Delta W}{\Delta q}$$

$$12 = \frac{(720 - 0) J}{\Delta q}$$

$$\Rightarrow \Delta q = 60 C$$

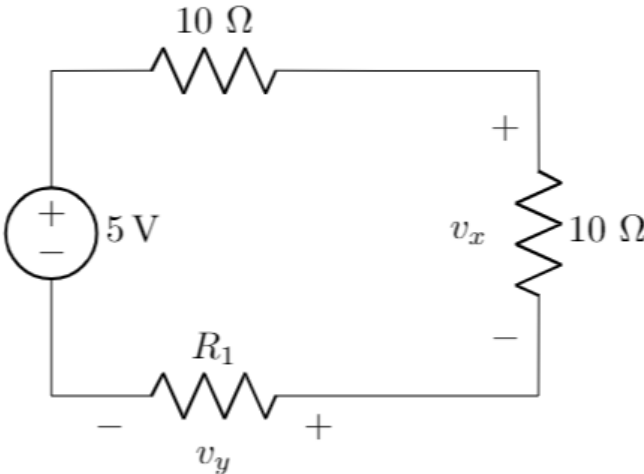

$$\Rightarrow I = \frac{60}{24 \times 60 \times 60}$$

← converting hours to minutes.

$$= 6.944 \times 10^{-4} A = 0.6944 \text{ mA}$$

Step 3: Do the assignment questions

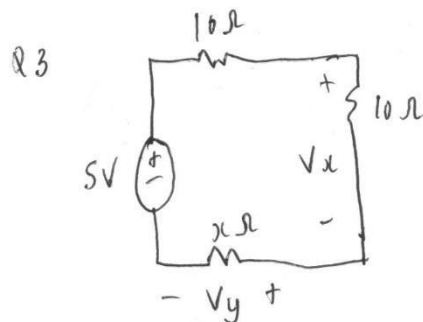

- Question 3 contains a circuit with one of the resistors given as variables.

Question 3 [2]	
Given: R_1 .	
 The circuit diagram shows a single loop. On the left vertical branch is a 5V DC voltage source with the positive terminal at the top. On the top horizontal branch is a 10Ω resistor. On the right vertical branch is a 10Ω resistor with voltage v_x across it, positive terminal at the top. On the bottom horizontal branch is a resistor labeled R_1 with voltage v_y across it, positive terminal on the right.	
03	Determine v_x . [2]

Step 3: Do the assignment questions

- Obtain the parameter from the excel spreadsheet and complete the question.

Question 3				
	Parameter / Description	Numerical	Units / Alphanumeric	Marks
	R1	15	ohm	
03	VX			2
Total				2

$$x = 15 \Omega$$

$$\Rightarrow V_x = 5 \times \frac{10}{10+10+15} = 1.429 \text{ V}$$

Step 4: Complete the EXCEL Spreadsheet

- Fill in student number, surname and initials.
- Proceed to fill the answers you obtained in each question into the spreadsheet.
- Only complete blocks that are highlighted in yellow.

2021EBN111T01	Student number:	12345678
21/02/2022 8:00 AM - 28/02/2022 11:59 PM	Surname & Initials:	Surname IS

Question 2				
	Parameter / Description	Numerical	Units / Alphanumeric	Marks
	c	12	V	
02	I	0.6944	mA	2
			Total	2

Numeric Value

Units

Step 3: Complete the EXCEL Spreadsheet

- Complete the rest of the questions and save file.
- It is recommended that you leave the file name as it is when downloaded
- Example of unit rules provided on excel spreadsheet.

Prefixes:

nano (10^{-9})	micro (10^{-6})	milli (10^{-3})	kilo (10^3)	mega (10^6)
n	μ	m	k	M
Examples: nA nW	Examples: μA μJ	Examples: mW mV	Examples: kΩ kW	Examples: MΩ Mohm

Complex numbers:

Rectangular format:	1.23+j4.56
Polar format:	1.23∠4.56°

Unit	Symbol
Ohm	ohm
	Ω
Volt	V
Ampere	A
Watt	W
Siemens	S
Coulomb	C
Joule	J
Second	s
Farad	F
Henry	H

Step 4: Submit the EXCEL spreadsheet before the deadline

- Click on the “SUBMIT UPLOAD” button.
- Press “Choose file” and browse for the excel file on the computer.
- Once the excel file is selected, press the “UPLOAD” button.
- If you get an error that there are incorrect symbols in the file name, then check that there are no spaces or brackets. This sometimes happens when you download the spreadsheet multiple times.

PRELIMINARY ASSESSMENT RESULTS Updated: 2020-02-20 14:05 SAST

ASSESSMENT OVERVIEW: 2020EBN111T01 ADMIN VIEW

SUBMIT UPLOAD GENERAL COMMENTS ORIGINAL GRID SCAN MARKING LOG MODULE OVERVIEW

Assessment:	Tutorial 01	Tutorial 1
Query Rating:	1.00	
Query Quota:	20 of 20 remaining	(alternate / marking)
First Viewed:	Never	
Last Viewed:	Never	
Full Mark:	5.00	
Mark Awarded:	4.00 (80%)	

Choose Files No file chosen UPLOAD

Only case-sensitive alphanumeric and underscore characters allowed in file names. Space characters are considered invalid and should be replaced with underscores. The maximum filename length is 64 characters (including file extension). If a file with the same name as an existing file is uploaded, the existing file will be **overwritten**.

Step 5: Complete the self-grading

- Once you uploaded your answer spreadsheet of an assignment, click the "SELF-GRADING" button as shown in the figure below.
- This will start the self-grading process, and your mark will be available once the process is completed. You may need to refresh your webpage to check your mark.
- You are allowed to make multiple uploads/submissions of your assignment answer spreadsheet. You can self-grade two of these trial submissions, after which the self-grading functions will be disabled. The self-grading function can obviously help you to improve your assignment mark, and you shall make good use of this function. The final mark will only be awarded to your final submission.

The screenshot displays the Judicator AMS interface. At the top, the header shows 'Judicator AMS' and user information 'JD le Roux (u04407342) Logout'. Below the header, the breadcrumb trail reads '/ Modules / 2020EBN111 / 2020EBN111T01'. The main section is titled 'PRELIMINARY ASSESSMENT RESULTS' with a timestamp 'Updated: 2020-02-20 14:05 SAST'. The central part of the page is 'ASSESSMENT OVERVIEW: 2020EBN111T01', which includes a row of buttons: 'SUBMIT UPLOAD', 'SELF-GRADING' (circled in red), 'ORIGINAL GRID SCAN', 'MARKING LOG', and 'MODULE OVERVIEW'. Below these buttons, a table provides assessment details:

Assessment:	Tutorial 01	Tutorial 1
Query Rating:	1.00	
Query Quota:	20 of 20 remaining	(alternate / marking)
First Viewed:	Never	
Last Viewed:	Never	
Full Mark:	5.00	
Mark Awarded:	4.00 (80%)	

Step 6: Query results if necessary

- After the submission deadline, all assignments will be marked. Marks will be released on AMS thereafter for you to review and query with detailed memo and marking log.
- If you disagree with the memo of an assignment question then you can query the question through the AMS system.
- When making a query ensure that the query clearly explains your alternative answer.
- Invalid queries or queries made through email will not be considered.

To request a correction on numeric or unit/text values extracted by the Optical Character Recognition (OCR) system, or to log a memo related query, please click on the provided link (shown by most browsers in blue). If the OCR system was not able to extract any value, a link is still provided to the left in the blank area.

- **Student Numeric:** Click the link in this column to correct the numeric value, i.e. you wrote 18 on the OCR form but it was extracted as 16. Special characters must be entered using the HTML-symbol codes, as described on the correction request page.
- **Student Unit/Text:** Click the link in this column to correct the unit or text, i.e. you wrote kΩ on the OCR form but it was extracted as kΩ. Special characters must be entered using the HTML-symbol codes, as described on the correction request page.
- **Correct Answer (Memo)** Click the link in this column to dispute the memo answer (i.e. there is an error in the memo) or to suggest an alternative answer.
- **Mark** Click the link in this column to query the mark itself, i.e. less marks are awarded than indicated in the memo and your answer matched the memo answer.

If the assessment includes a manually marked question, a link will appear in the **Mark** field in order to log a query for the particular question. For such manually marked questions a link will also appear in the question number field. This link will display the student submission assessed and the marking rubric used to mark the submission.

The status of a query is indicated by the following colour codes:

Once a query has been entered you can obtain more detail or the current status of the query by clicking on the link again. **Note that accepted queries will not immediately reflect in the assessment view. Accepted queries will be processed when the assessment is remarked for all students (typically once or twice per day whilst queries are open).**

Question	Summary	Student Numeric	Student Unit/Text	Correct Answer (Memo)	Full Mark	Mark
S1	SECTION 1 TOTAL				6.00	11 4.00
01	I_S	10	mA	10 mA	2.00	2.00
02	V_X	12	mV	12 mV	2.00	2.00

Summary

- You will access EBN assignments, and submit your assignment answers on the AMS system.
- Answer on Excel and submit file on AMS.
- View result on AMS.
- You are allowed to self-grade your answers twice before making your final submission.
- Make a query if you disagree with the memo.
