

FSK 116 2021 PRACTICAL TEST INFORMATION AND TIPS

The Practical Test will take place on **Monday the 21st of June**. The test will be available from **10:00** on Monday 21 June, and is due at **23:59** on the same day (21 June). You must complete both parts during this time. The whole test should not take more than 1.5 to 2 hours.

PART A

1. It is **COMPULSORY** to draw your graphs on the graph paper provided. There are 2 graphs in the test, so please print at least 2 copies in advance (maybe a few more in case you make a mistake and need to start again).
NB: *You are NOT allowed to use Excel or any graphing software to draw graphs.*
2. You must submit PART A as a **single PDF document**. Here are a few options:
 - a) You may complete the questions on MS Word, then convert the document to PDF and submit. Remember to scan in your graphs and merge them to the document, or you can take good clear pictures of the graphs and insert them into your Word document (answer sheet), then convert to PDF and submit.
 - b) You may print out the answer sheet and fill it out by hand. Then scan it and submit a single PDF file. Remember to make sure you scan the pages in order.
 - c) You may write out your answers on normal lined paper, then scan it and submit a single PDF file. Remember to clearly label your answers and make sure your answers are clear and easy to read. You still have to draw your graphs on the graph paper provided, so remember to scan those in as well.
3. All hand-written work must be written in PEN (including the graphs).
4. You will not be required to physically set up an experiment, so no equipment necessary.
5. **PLAGIARISM IS NOT ALLOWED.**

PART B

PART B consists of Multiple-Choice Questions and will be in the form of a **clickUP test** (NOT WebAssign). You will find the test under the **"Online Practicals & Practical Test"** tab on clickUP. You will have **45 minutes** to complete this section of the test. Each Multiple-Choice question has only ONE CORRECT answer. Each question counts two marks.

PRACTICAL TEST TIPS

The test will cover ALL the experiments that you did during your practical sessions this semester. You will need to study and understand what you did in the experiments you did at home.

- APPLY GRAPH RULES CORRECTLY. Make sure you go over the graph rules thoroughly and apply them. You will lose marks if you don't.
- APPLY rules about significant figures, UNITS, scientific notation etc., CORRECTLY. Go through the "Lab Introductory Notes" document under Online Practicals thoroughly. If any of these rules are not followed, you will lose marks.
- DO NOT leave this test until the last minute.

I am confident that if you understand the practicals we did this semester, and you apply all the rules correctly, you will do very well in this test.

ALL THE BEST!
