

- (ii) Die persoon roei 33 m na P_2 en ondervind vir die eerste keer kalm water.
The person rows 33 m to P_2 and for the first time experience calm water.
 Gee die fase ϕ in hierdie geval. / Give the phase ϕ in this case.

$$\phi = \pi$$

(1)

Bepaal nou ΔL / Determine ΔL

$$\phi = \frac{\Delta L}{\lambda} \cdot 2\pi = \pi \therefore \Delta L = \frac{\lambda}{2}$$

(2)

Toon aan dat $S_1P_2 = 86,5$ m. / Show that $S_1P_2 = 86,5$ m.

$$S_1P_2 = \sqrt{(43)^2 + (75)^2}$$

$$= 86,5 \text{ m}$$

(1)

Bepaal S_2P_2 / Determine S_2P_2

$$S_2P_2 = \sqrt{(23)^2 + (75)^2}$$

$$= 78,4 \text{ m}$$

(2)

Bepaal die golflengte λ . / Determine the wavelength λ

$$\Delta L = \frac{\lambda}{2} = 8,1$$

$$\lambda = 16,2 \text{ m}$$

(3)
